3D LASER TECHNOLOGY

design Made in Italy

Reticube[®]
technology

WORLDWIDE PATENT

3D LASER TECHNOLOGY: DARE UNA NUOVA FORMA AL FUTURO.

Reticube Technology® è un marchio brevettato che produce maniglie, pomoli, accessori bagno e coprinterruttori attraverso la sinterizzazione laser 3D.

Dieci anni fa nasceva la storia di Reticube, un progetto tecnologicamente avanzato che guardava oltre ogni immaginario.

La storia di **un processo di produzione a laser unico** che non solo ha permesso la realizzazione di maniglie e pomoli in 3D con infiniti sottosquadri ma offre la possibilità a chiunque desideri realizzare un disegno tridimensionale di farlo senza nessun limite.

Dall'idea al progetto fino alla sua realizzazione, il ciclo produttivo si svolge tutto interamente in Italia, nel nostro stabilimento di Calderara di Reno in provincia di Bologna.

3D Laser Technology Made in Italy.

Tutti possono realizzare modelli in 3D, ma la nostra tecnologia è diversa: **qualità, quantità, costi di produzione e infinite possibilità progettuali.**

Tutti i nostri **prodotti** sono **realizzati** principalmente in **ottone o in argento 925 ‰** e seguono una precisa lavorazione:

disegno 3D, realizzazione laser, smerigliatura, pulimentatura e deposizione della galvanica.

A richiesta viene anche effettuato il rivestimento in PVD.

Ogni passaggio viene scrupolosamente seguito dai nostri tecnici atti a garantire una qualità che è rimasta inalterata nel tempo.

3D LASER TECHNOLOGY: GIVING THE FUTURE A NEW SHAPE.

Reticube Technology® is a patented brand that produces handles, knobs, bathroom accessories and lightswitch covers through 3D laser sintering.

Ten years ago the story of Reticube was born, a technologically advanced project whose vision went beyond imagination.

The story of a unique laser production process that allowed not only the creation of 3D handles and knobs with infinite variances but also offering the possibility to create any three-dimensional design with no limits.

From the idea to the project until its realisation, the production cycle takes place entirely in Italy, in our factory in Calderara di Reno in the Province of Bologna.

Made in Italy 3D Laser Technology.

Everyone can make 3D models, but our technology is different in terms of **quality, quantity, production costs and infinite design possibilities.**

All our main products are made of brass or sterling silver and follow a precise manufacturing: 3D design, laser manufacturing, grinding, cleaning and electroplating.

Upon request, PVD coating is also carried out.

Each step is scrupulously monitored by our technicians to ensure unchanged quality over time.

La realizzazione di progetti personalizzati è un plus, che la 3D laser technology incarna come altamente innovativa e dal potenziale in continua crescita.

Oggi possediamo una vasta esperienza e conoscenza della lavorazione laser e siamo focalizzati costantemente sull'evoluzione futura nel settore dell'**interior design**.

The realisation of customised projects is a plus, that 3D laser technology embodies with highly innovative potential in continuous growth.

Today, we have extensive experience and knowledge of laser processing and we are constantly focused on future evolution in **interior designs**.
